

This document is a non-official English translation of the official French “règlement intérieur” governing the Guix Europe association; only the French version is binding.

Interior Reglementary

The Interior reglementary has the same binding force towards the members as the statutes of the Association. This reglementary has been written in conformance with the process established by the statutes.

Article 1: Amount of the membership fees

Membership fees are computed by calendar year; in the case of admission during the year, the full amount is due. The current membership fees are 10€ per year.

Article 2: Conditions of admission

A person desiring to obtain the member status needs to (in conformance with the reglementation):

- be major or be represented by a major legal guardian;
- communicate in written or by e-mail to the Board a demand for admission;
- accompany this demand by:
 - their name and first name;
 - their birthdate;
 - their complete postal address, their e-mail address and any other means of communication by which to join them;
 - potentially their OpenPGP key;
 - potentially their motivations to join the Association.

The membership demand must be accompanied by the membership fees. These may be paid in cash, by wire transfer to the account of the Association or by check.

In conformance with the statutes, the Solidary Administrative Council reserves the right to accept or not a new member.

Article 3: Presence in electronic form

The Board may make possible a participation to the Solidary Administrative Council and to the General Assemblies in electronic form, be it by audio- or videoconference, e-mail, social networks or any other form of electronic participation. Members participating in electronic form are counted as present just as members who are physically present, in particular as quorums are concerned.

Article 4: Electronic vote

The Board may, additionally to and complementing the vote in physical presence, make an electronic vote possible for the meetings of the Solidary Administrative Council and the General Assemblies, by any suitable means.

In particular, a member may vote sending to a member of the Board an e-mail signed with their OpenPGP key or, if such a key has not been specified during their admission, coming from their e-mail address communicated during their admission.

Members taking part in an electronic vote are counted as being present for the topics covered by this vote with the same rights as members who are physically present, in particular as quorums are concerned.
